Version Control:

- GitHub

Projects

Bubble Game using Event Bubbling (JavaScript)

[[Live](#)]

- A browser-based game demonstrating event propagation concepts, including capturing and bubbling, to engage users in interactive learning.
- Features score-tracking and dynamic content updates for an enhanced user experience, encouraging repeated gameplay.

Todo App (ReactJS)

[[Live](#)]

- A fully functional to-do list application built with ReactJS, featuring CRUD functionality for managing tasks effectively.
- Utilizes localStorage for persistent data storage, allowing users to mark tasks as completed and keep their lists organized.

Quote Generator (JS API Integration)

[[Live](#)]

- Developed a Quote Generator application using JavaScript and React, enabling users to effortlessly generate random quotes for inspiration and motivation.
- Implemented an API integration to fetch quotes dynamically, enhancing user engagement through a seamless and interactive interface.

Certifications

- Frontend Development with React, OdinSchool - [Certificate](#)
